# ARTICULATE

## Poetry in Fine Art Photography *by Mario Cerroni*

*The world around us presents a variety of themes, rhythms and patterns, a poetry found in wondrous landscapes, in the geometry of an architect's dream, in the mysterious allure of an abstract, or in the delight of elements interacting in a moment of frozen time.*

*Sometimes I tune into those with my camera, and sometimes the poetry that is revealed in the themes and elements within the photo compel me to try and capture the words they speak.*
